Client: Nilfisk

Project: Microsite

Job: 95701

Deadline - 17 Nov updated staging for sign off

ATTN DEVELOPMENT

NOTE screenshots have been supplied via EMAIL

@Gavin - please advise?

A **question on the technical specs/downloads we discussed adding onto the category pages**, it doesn't look like this was implemented? We need this specifically for the chemicals and machines.

@Nicole:

- Some of the pictures are really blurry despite having been supplied in high res – is there a reason for this? (see attached example)

@Gavin can you recitify:

- Some of the carousel images have a window with call to action button, but ie. in Paso bins & specialized mops, but they don't link to anything.
- The mopping system on the front page is a Vileda Ultraspeed Mopping System, not a Top Down System
- Capital "c" for "Clean water system
- Pressure washer should be plural
- Under machines, Nilfisk doesn't link back to www.nilfisk.co.za – not sure if this is still to be corrected?
- Twitter link is to the UKI page, not ZA www.twitter.com/NilfiskZA
- Facebook is to global Nilfisk page, not www.facebook.com/NilfiskSouthAfrica/

Please supply staging with updates as per brief.

Thanks

Steph
